ABOUT ME

Degree in IT Analyst from ORT University, with advanced English proficiency. I have experience in both software and hardware areas.

In software, I specialize as a full stack developer, with experience in web and desktop applications, as well as in managing relational databases.

In hardware, I have experience in basic maintenance and repair of electronic devices, as well as in integrating them with digital systems, especially in Internet of Things (IoT) projects.

SKILLS

- FullStack Web Development: **ReactJS** and **ExpressJS**.
- Desktop Application Development: **JAVA**
- Databases: **MSSQL**, **MySQL**, **PostgreSQL**.
- Basic Knowledge: **Python**, **C#**
- Deployment: **Render**, **GithubPages** and **Azure**.
- Version Control: **Git** and **Github**.
- Internet of things (IoT): **Arduino**

LANGUAGES

English
2000 - 2008: Teacher's Institute (*Montevideo*).
2009 - 2011: Anglo
First Certificate Cambridge.

Portuguese
2020: VerdeAmarelo Academy

WORK EXPERIENCE

Software Analyst and Project Management
Proyectos Ingeniería
March 2022 - present
I am part of a team responsible for managing software projects for time and access control, covering analysis, development, implementation, and maintenance. We collaborate with other teams in the planning and execution throughout the different stages of the projects.

I provide technical support to clients across Uruguay, both remotely and on-site, performing analysis in collaboration with each client for system configuration and managing data used for payroll processing by the HR department.
I develop and update our applications to meet the specific needs of clients, including basic maintenance tasks such as backups and database installations, as well as developing functions and custom queries.

Additionally, I perform maintenance on electronic devices and participate in their integration with digital systems, collaborating in IoT-related projects.

Fraud and Hacking Prevention Representative
MercadoLibre - MercadoPago
February 2015 - December 2019
User activity and behavior analysis on the platform across several Latin American countries, primarily Argentina, Brazil, and Mexico.

Monitored transactions made through digital means (bank transfers, card payments, QR codes, etc.) and made decisions regarding them.

Worked as part of a team to develop and implement various strategies and decision flows tailored to different contexts.
